

MARIAN CATHOLIC High School

To Whom It May Concern,

If the Robotics Team from Marquette University is at all indicative of the future of Nasa, then NASA will be in extremely intelligent, passionate, and innovative hands. These qualities were showcased during the presentation given at Marian Catholic High School in Chicago Heights on Thursday March 14, 2019. The four members of the team presented Space and Engineering Night, featuring their entry in NASA's Mining Robot Competition, as well discussions regarding engineering careers, college life and a variety of other helpful topics.

This outreach was engaging and filled a need for the next generation of engineers as the students present were clearly looking for the information presented and the opportunity to converse with engineering students or those just entering the field.

Our thank you's again to the Marquette Team for a job well done.

Sincerely,

A handwritten signature in blue ink that reads 'Becky Bosco'.
